DETAILED ACTION

Allowable Subject Matter

Claims 1-10 and 12-21 are allowable. Claim 11 is cancelled. Amendment to claim 12 to correct a typographical error filed 24 June 2010 after Notice of Appeal is acknowledged.

Note terminal disclaimer filed 25 September 2008 under assignor Electronic Data Systems, LLC. Note replacement drawings for Figures 1-12 filed 25 September 2008.

The following is an examiner's statement of reasons for allowance: The claimed invention is directed to computer modeling integrated business and information technology frameworks and architecture in support of a business. Specifically, the allowable feature of independent claims 1 and 12 is

generating, by the computer, a plan for implementation and deployment of future information technology among the manageable entities based on the determined information technology requirements for display by the computer within the graphical representation of the overall architecture, the plan including a future security architecture based on the future information technology and a transition between a current security architecture and the future security architecture, wherein each of the current security architecture and future security architecture includes a corresponding set of a security objective and a mix of security measures.

The prior art of record, namely, Buteau et al. (US 6442557), Ruffin et al. (US 6249769), Baudoin et al. (US 7290275, and McKenna et al. (US 2004/0010772) do not teach or suggest, alone or in combination, the totality of the recited feature.

Buteau discloses evaluating the enterprise architecture with work flow, information, and technology models. Ruffin teaches evaluating the information technology environment and business requirements of an entity. Baudoin teaches assessing the information security policy

Art Unit: 3689

and practice of an organization. McKenna teaches facilitating the development of software applications. However, the limitation of generating a plan for implementation and deployment of future information technology with the specific consideration of and transition to a future security architecture as limited above is not obvious over the prior art.

Furthermore, note parent application 09/378514, filed 20 August 1999, now US Patent 7162427.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Debra Antonienko whose telephone number is 571-270-3601. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janice Mooneyham can be reached on 571-272-6805. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
